

HEAVY DUTY PROFESSIONAL INSTALL MOUNTS

In addition to the newer System 2 modular component mount system, B-Tech offers the “Classic” 60mm pole system, thereby providing ongoing support for this very popular legacy modular component mount system. While System 2 is supplied in Black, the Classic 60mm system is supplied in Silver. Like System 2, our Classic 60mm system offers an unbeatable combination of intuitive simplicity, modular interchangeability, heavy-duty durability and security, and assured cost-effectiveness....four important reasons why professional installers look first to B-Tech for their commercial component mount needs.

BT7526
